

RANGE SUMMARY OF RITEL PRODUCTS, AS SUPPLIED BY ELLMAX ELECTRONICS LTD., LONDON

Ritel's range of quality products feature control knobs in various sizes, designs, and colours, with full accessories such as caps, dials, and pointers. Both standard and matt finishes are available. Standard collet knobs, short knobs, double knobs with coaxial collets, push-on knobs, soft-touch knobs, conductive knobs, and 4mm terminals are included in the range. Please refer to Ritel's catalogue and website for a detailed description of the product range, including photos and technical drawings.

All the various Ritel control knob part numbers are of the form 'abcdefg', where 'ab' is the knob design, 'cd' is the knob size, 'ef' is the collet type, and 'g' is the colour. 'ST' is added at the end of the basic shape knob part number to form the soft-touch knob part number (see page 27). Ritel's knobs, accessories, and terminals are all RoHS compliant. The temperature specification for all standard Ritel parts for normal mechanical stress is -20°C to +70°C.

RANGE SUMMARY OF RITEL PRODUCTS, AS SUPPLIED BY ELLMAX ELECTRONICS LTD., LONDON

Collet knobs are made up of three main parts: the body, the cap, and an optional skirt such as a dial or an arrow. Collet knobs, which are available in a large variety of sizes, colours, and designs, ensure a secure mounting and are suitable for most instrument knob applications. They can be used for all standard potentiometer and switch shaft diameters, such as 3mm, 0.125 inch, 4mm, 6mm, and 0.25 inch, which are either cylindrical or with flat (i.e. D-shaped). Sizes of Ritel knobs range from body diameters of 8mm to 45mm. All standard Ritel collet knobs are mounted with screws which are a combination of ordinary one-slot screws and Phillips cross-slot screws. These screws may be tightened with either an ordinary screwdriver or a Phillips screwdriver. The cap snap fits into the top of the knob. Pictures of various control knobs with caps are shown on the front page of this range summary. Pictures and details of all the dials, stators, and arrows are shown in the section on Accessories, starting on page 19.

RANGE SUMMARY OF RITEL PRODUCTS, AS SUPPLIED BY ELLMAX ELECTRONICS LTD., LONDON

15mm Short Knob

Ritel short control knobs have lengths reduced by about 20% compared to the standard knobs in the range. The short knobs are mounted using a commercial hexagonal box spanner, unless indicated as having a 'screw' rather than a 'nut' fitting, in which case they are mounted using either an ordinary screwdriver or a Phillips screwdriver. All accessories are usable with these short knobs. Please note that for caps for any 15mm short knobs, please add "BV 204" to the normal cap part number appearing on page 7.

8 - 45mm Accessories

The Figure Dial, Arrow Dial, and Arrow skirts all have pins on the same face as the markings, and these skirts are attached to the knob by push fitting the pins into the holes in the underside of the knob. Glue may be used for a permanent fixing. The Stator has fixing pins on the opposite side to the markings. The sizes of these skirts are given in Ritel's catalogue.

Double Knobs with coaxial collets

All the various Ritel control knob part numbers are of the form 'abcdefg', where 'ab' is the knob design, 'cd' is the knob size, 'ef' is the collet type, and 'g' is the colour. For the double knob with coaxial collets, the upper knob is the standard unit (for the smaller of the two shafts) and so the part numbers for the upper knob and cap are as shown in the preceding pages. An intermediate cap between the two knobs has the part number shown on the next page. The lower knob has a collet (for the larger of the two shafts, and enabling the smaller shaft to pass through) with the code for the 'ef' section of the part number (i.e. the collet type) as shown below, and the rest of the lower knob part number is as shown in the preceding pages.

knob size	shaft \varnothing	collet code

ELLMAX ELECTRONICS LTD., LONDON**
Soft-touch Knobs with matt finish

Ritel's soft-touch knobs come with either a single collet or a double collet. The soft-touch control knobs are based on the basic shape knobs with diameter 15, 21, 28, and 36mm. They come with or without lines, and their finish is matt only. 'ST' is added at the end of the basic shape knob part number to form the soft-touch knob part number. For example, a 15mm single collet soft-touch black knob with a 1/4" shaft size, with a line (and with a matt finish) has the part number 2715613ST.

All accessories may be used with Ritel's range of soft-touch knobs.

Special Knobs, including Conductive Knobs

Ritel produce various special knobs, such as conductive knobs which are used in motorised faders and controls, to suit customers' requirements. Please contact us for more information.

The logo for ELLMAX ELECTRONICS is centered on the page. It consists of the words "ELLMAX" and "ELECTRONICS" stacked vertically in a bold, sans-serif font. The text is contained within a light blue, rounded rectangular border. The background of the entire page is a light blue halftone dot pattern.
